ENVIRONMENTAL POLICY OF JOSE NICOLAS GONZALEZ, S.L.

AP10B401		
Version: 02	ENVIRONMENTAL POLICY	

San Pedro del Pinatar, Murcia, 3rd June 2024

At JOSE NICOLAS GONZALEZ, S.L. we promote an innovative and circular economy in which biodiversity is protected, valued and restored. Our company promotes minimizing the environmental impact of our suppliers and of our IQF fruit and vegetable marketing service, from origin to delivery to our customers: Purchase of raw materials (fruit and vegetables), handling of raw materials by third parties, freezing of raw materials by third parties, storage of frozen vegetable products by third parties and transport of the final product by third parties.

The management of JOSE NICOLAS GONZALEZ, S.L. considers and declares the following as strategic principles of its environmental management:

- The principle of environmental responsibility: we can all improve our environment.
- The principle of prevention: better to prevent than to produce ecological disasters.
- The principle of substitution of phytosanitary products with other less polluting products, or their total elimination in the case of ecological products.
- The principle of business coherence, coordinating our environmental policies with other departments and the integration of environmental objectives.
- The principle of cooperation with our environment, working towards environmental improvement objectives.
- Our environmental policy is based on the results of current scientific research.
- We respect and encourage our suppliers to comply with environmental management laws and standards.
- Our way of working minimizes the environmental impact as much as possible, as well as the waste generated in our activity.
- We promote reuse and recycling.
- To obtain maximum motivation on environmental protection from suppliers, ensuring the effective development of the objectives set out in this policy.

In order to achieve these objectives, it is the management policy of JOSE NICOLAS GONZALEZ, S.L. to lead and stimulate the execution of the following actions:

- Establish and maintain a Quality, Food Safety and Environmental Efficiency system to be developed in coordination with the rest of the Management functions.
- To allocate the necessary efforts and resources to improve our environmental surroundings.

CEO: DE JOSE NICOLAS GONZALEZ, S.L.
